OBJECTIVE

Front-End Developer with 4+ years of experience building scalable, high-performance web applications using Angular, TypeScript, and RESTful APIs. Proven track record of architecting complex UI solutions, including a comprehensive Transportation Management System and a dynamic eLearning portal. Strong background in state management, reactive programming (RxJS), performance optimization, and agile methodologies. Adept at collaborating with cross-functional teams to deliver production-ready, user-centric applications. Seeking to leverage front-end expertise as an Angular Developer at CHETU INC to drive innovative web solutions.

Education

Technocrats Institute of Technology, RGPV

Jul 2017 – Jul 2019

MCA, Bhopal

SKILLS

Frontend: Angular (v2+ to latest), TypeScript, JavaScript (ES6+), RxJS, NgRx (State Management), HTML5, CSS3/SCSS, Angular Material, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, RESTful APIs, WebSockets, JWT/OAuth,

Database: MongoDB, PostgreSQL, MySQL, Firebase

DevOps and Tools: Angular CLI, Git,

Testing Tools: Jasmine, Karma

AI Tools: GitHub Copilot, Claude

Experience

Senior Software Engineer.

Aug 2021 - Till Date

Chetu India Pvt. Ltd

Noida (U.P.), India.

- Developed enterprise-grade web applications using **Angular** and **TypeScript**, incorporating **DevExpress** grids and **Material UI** for optimized, high-performance user interfaces..
- Implemented secure **JWT**-based authentication and role-based access control to manage sensitive user sessions across distributed modules.
- Enabled **real-time chat** functionality and **live data streaming** within the dashboard using **Socket.io**, ensuring instant synchronization between clients and servers.
- Integrated third-party services and APIs to fetch external data, optimizing asynchronous processes to enhance application responsiveness.
- Developed reusable component libraries and optimized state management with **RxJS**, significantly reducing code redundancy and initial load times.
- Leveraged expertise in **Node.js** backend services and **React.js** prototyping to bridge full-stack gaps while voluntarily contributing to cross-team deliverables.
- Voluntarily contributed to code reviews and resolving critical blockers beyond assigned responsibilities, helping improve overall team delivery efficiency.

PROJECTS

Dynamic Transportation Management System (DTMS)

Angular, DevExtreme

- Architected a comprehensive enterprise TMS featuring modules for freight management, vehicle tracking, dispatch, Order, processing, and automated billing.
- Leveraged DevExtreme (DevExpress) to build high-performance, complex data grids and dashboards, optimizing the rendering of large-scale logistics datasets.
- Streamlined operational workflows and dispatch processing, significantly improving route efficiency and overall productivity for transportation companies.

Horse Riding Events Platform

Angular, Socket.io

- Developed a real-time event management platform connecting horse owners, riders, and enthusiasts for seamless event coordination.
- Implemented live data streaming using Socket.io and Server-Sent Events (SSE) to deliver instant, real-time status updates on event participation and live show results.
- Designed an intuitive, responsive UI with Angular Material, ensuring a smooth experience for users tracking live events on both desktop and mobile devices.

eLearning Portal

Angular, RxJS

- Engineered a scalable online learning platform delivering interactive courses, video lectures, automated quizzes, and a community forum.
- Utilized RxJS for complex state management to track user progress, video playback states, and quiz submissions in real-time without page reloads.
- Built a highly accessible and flexible UI, ensuring high-quality learning experiences and seamless navigation across diverse course modules.

Social Media Platform

Node.js

- Built an Instagram-inspired social media application featuring unique gamified puzzle challenges to drive user interaction and engagement.
- Developed custom image-processing workflows allowing users to upload, slice, and share photos as interactive puzzles.
- Integrated secure JWT authentication and optimized media storage using AWS S3, ensuring fast image loading and secure user data handling.

Healthcare Staffing & Service Portal

Angular, REST APIs

- Developed a secure, comprehensive portal to address healthcare staff shortages by connecting facilities with qualified, experienced healthcare professionals.
- Built intuitive scheduling, profile management, and compliance-tracking dashboards to streamline the recruitment and deployment process.
- Focused on delivering a person-centered user experience, implementing robust search and filtering algorithms to ensure high-quality client-staff matching.

CERTIFICATION

- Angular - Udemy (2021)
- Introduction to programming Using HTML and CSS - Udemy (2020)
